

# Measuring Judicial Independence in the American States: A Latent Variable Approach

Jeremy R. Johnson

The Pennsylvania State University

*Jeremy.Johnson@PSU.edu*

April 23, 2015

# Defining Judicial Independence

“We all know what it means, yet frequently we advance arguments about ‘judicial independence’ without articulating precisely what it means.” - Becker (1970)

# Defining Judicial Independence

“ Judicial independence is merely the other side of the coin from judicial accountability” – (Burbank, 2008)

# The Judicial Independence Continuum

## Judicial Independence Continuum

# Indicators of Judicial Independence

- Selection System
- Retention Election
- Term Length – Initial and Subsequent
- Docket Control

# Selection System

## Selection Method Independence Continuum

# Retention Elections

## Retention Method Independence Continuum

# Term Length

## Term Length Independence Continuum

# Docket Control

## Docket Control Independence Continuum

# Specification

- Bayesian IRT Model
- 4 or 5 Indicators

# Model

## Probability Distribution for a Given Response

$$P[y_{ij} = k] = F(\alpha_{jk} - \theta_{it}\beta_j) - F(\alpha_{j,k-1} - \theta_{it}\beta_j)$$

# Model

# Model

Likelihood for Logistic Distribution

$$\mathcal{L}(\beta, \alpha, \theta | y) = \prod_{i=1}^N \prod_{t=1}^T \prod_{j=1}^J [F(\alpha_{jy_{itj}} - \theta_{it}\beta_j) - F(\alpha_{jy_{itj}-1} - \theta_{it}\beta_j)]$$

# Five Indicator Model Over Time

# Five Indicator Additive Model

Pearson's  $R = -.9553$

# Five Indicator Beta Discrimination

# Judicial Independence Over Time

# Regime Change Model Scores

# Convergent Validity-Ginsburg and Melton Replicaton

## Correlation of Measures

	Additive	IRT	Melton and Ginsburg
Additive	—	−.95***	−0.45**
IRT	−0.95***	—	0.52***
Melton and Ginsburg	−0.45**	0.52***	—

*Note:* \* $p < 0.1$ ; \*\* $p < 0.05$ ; \*\*\* $p < 0.01$

# Random Measures Replication

Table : Correlation of Estimates with Enns and Koch (2013)

	Mood	2 Dimension Mood	Posterior Estimates
Mood	–	0.58***	0.40**
2 Dimension Mood	0.58***	–	0.16
Posterior Estimates	0.40**	0.16	–
Additive	–0.40**	–0.15	–0.95***
Note:	* $p < 0.1$ ; ** $p < 0.05$ ; *** $p < 0.01$
